## STEP BY STEP SOLUTION

Go to the /robots.txt webpage in the given website.

(note)

A **robots.txt** file is a simple text file that provides instructions to web crawlers (bots) about which pages or files they can or cannot access on a website. This file is primarily used to manage crawler traffic and prevent overloading the server with requests.

On going to that webpage we find:

```
User-agent: *
Disallow: /Fuck_Cl4nk3rs_938rh349xn231c23ur89uux9823e982x38ryb.html
```

So crawlers cannot access that webpage. And that's where the flag might be.

So many secrets lost to fucking clankers , only the realist of the humans can see this one.
